DETAILED ACTION

Response to Amendment

1. The present Office Action is taken in response to applicant's communication filed 04 April 2007.
2. Claims 1-37 are pending in the application under prosecution.

Response to Arguments

3. Applicant's arguments with respect to claims 1-37 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-37 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The clause "possible retention" is indefinite language as it is unclear whether data is retained in the cache.

Claim Rejections - 35 USC § 101

6. 35 U.S.C. 101 reads as follows:

Art Unit: 2186

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

the claimed invention is directed to non-statutory subject matter. Claim 1 recites, "receive data for possible retention", it appears that there is not a definite result.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1-3, 14-17, 22, and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by US 6,263,407 (Arimilli et al).

With respect to claims 1-3, 14-17, 22 and 28, Arimilli teaches cache controller coupled to said coherency indicator, said tag storage and said data storage, wherein responsive to detection of a data transfer on the interconnect initiated by a read request of another device in the data processing system, said data transfer including a second data item, said cache controller determines whether or not to update said data storage based upon (1) a mode of operation of said cache, (2) whether said coherency indicator indicates said data-invalid state, and (3) whether said address tag matches an address associated with said data transfer, and wherein, responsive to a determination to update to said data storage, said cache controller stores said second data item in said data

storage in association with said address tag and updates said coherency indicator to said valid state [Fig. 2; Col. 4, Line 45 to Col. 5, Line 25].

Allowable Subject Matter

9. Claims 4-13, 18-21, 23-27, and 29-37 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

10. Claims 4-13 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion
